

I can replicate fonts and artwork with high contrast.

What You Should Expect

- Rubber stamp (of your design) mounted on wooden block
- OR
- Rubber stamp (of your design) not mounted

Information I need

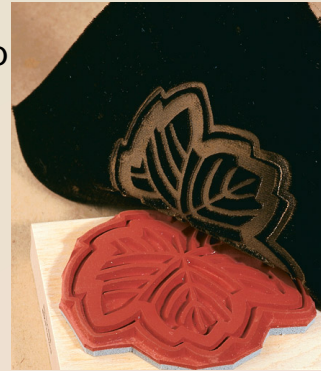

- Your design (digital), can be a photo of physical.
 - Ideally its high contrast with few colors, I will adjust the design for stamping. (This should just be recoloring and outlining)
- Proof of permission of replication or of free use of design. (Even though I'm doing this for free, CYA)
- Size, no bigger than 4"X7", no smaller than 1/2"X1/2"
- Would you like it mounted on a wood block?

Rubber stamps are used mostly with ink stamp pads. Printing with fabric can be done using "Fabric Block Printing Ink" and a roller tool.

I've also seen

Heat + stamp + velvet fabric =
Embossing

*Not my photo

WereStamp Policy

- Worn out stamp from printing?
Let's talk other printing options or a remake.
- Printing doesn't look as clean as it could? I will diagnose and fix that block.
- Fallen off wooden mount?
